# **Cultures of Research**

International Conference

March 25-27, 2025, Forum M, Buchkremerstraße 1-7,  
52062 Aachen

## **The Conference**

The international conference “Cultures of Research” takes stock of the first four years of the fellow program at the Käte Hamburger Kolleg: Cultures of Research (c:o/re), the international Center for Advanced Studies in History, Philosophy and Sociology of Science and Technology at RWTH Aachen University. During these years, more than fifty international fellows came to c:o/re to explore the transformation of research in its many facets. Topics such as the digitalization of science, the growing influence of AI on research practices, the organizational transformations in science, the “engineering of science”, and the historical as well as intercultural comparison of “varieties of science” have been widely discussed.

The international conference “Cultures of Research” will focus the discussions on these topics in various panels with current and alumni fellows as well as with members of the scientific advisory board of c:o/re.
